

New Features in simplex Meeting 6.9

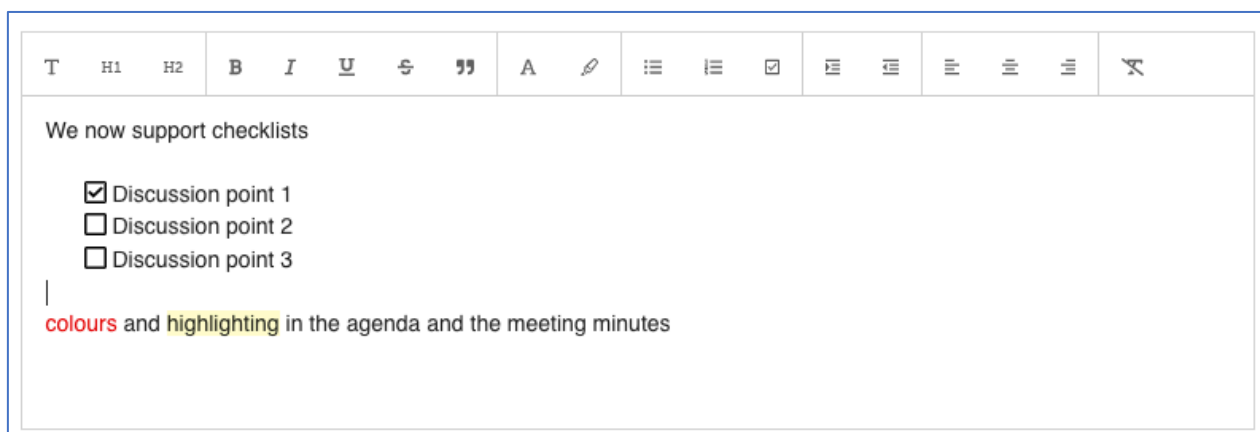

Available in Ukrainian

The web meeting platform is now available in Ukrainian. Resellers and White Label customers can activate this new addition in their system settings.

Checklist in the agenda and the meeting minutes

We now support checklists and colors in the agenda and meeting minutes. This allows to mark tasks as “done”. It is particularly helpful in follow-up meetings.

Schedule meetings on the second Thursday of a month

Recurring meetings can now be scheduled on the specific weekday of a month, for instance “every first Thursday of the month”

Recurring meeting

Frequency
 Never Daily Weekly Monthly Yearly

Repetition
Occurs every 1 month(s) on the 2. Tuesday on the 8. day

Repetition end
 Open ended
 Ends after _____ meeting(s)
 Ends on March 8, 2022

Other options
 Always transfer the content of one meeting to the next one

Partially recorded meetings

Meeting recordings can now be started and stopped multiple times during a meeting. The system will produce a recording file consisting of all recorded parts merged into one file. The individual parts can be downloaded separately too. Select “partially recorded meeting” when setting up your meeting.

Meeting type
 Standard - up to 5 participants
 Off-the-record - up to 5 participants
 Audio only room - up to 30 participants
 Boardroom - up to 30 participants
 Webinar - up to 3 moderators and 50 participants

Enable dial-in

Enable recording

Recording type
 Record entire meeting
 Start and stop recording during meeting

Note: We store the recordings for 14 days only. Please remember to request and download the recording right after your meeting.

Audio player

We now also support audio files in the meeting room. This addition completes our synchronized video player. Audio files uploaded during a meeting are automatically recognized as such and can be played in the same way as videos are played.

Meeting Room Widgets - Custom tools

Sometimes the available collaboration tools are not enough for specific use cases. You might want to display additional content, tools or widgets in the meeting room itself, for example patients' information during a tele-health session, customer details during a sales pitch, etc. Custom tools and meeting room widgets give developers complete flexibility to provide meeting rooms exactly like the use-case demands.

Find out more about meeting room widgets here:

<https://www.veeting.com/en/developer-documentation/custom-tools>

Video display calculator

We have extended our existing Javascript APIs with a new video display calculator API. This allows developers and integrators to decide by themselves how videos are displayed in the meeting room itself. Front-end Javascript developers can override the default video positioning by implementing their own layout and position the participant videos freely in the video container.

Find out more about the video display calculator API here:

<https://www.veeting.com/en/developer-documentation/video-display-calculator>

Additional White Label Settings

You might not want to confuse your users with device tests prior to joining meetings, or, depending on your jurisdiction, you might not need to ask users for consent. Resellers and White Label customers can now hide these tests from the "Join Meeting" screen.

| | | |
|----------------------------------------------------------------------------|--------------------------------------|--------------------------|
| Do users have to give their data sharing consent before joining a meeting? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
| Is there an initial device test step before joining a meeting? | <input checked="" type="radio"/> Yes | <input type="radio"/> No |
